

As a future subscriber to XM Satellite Radio, I do not agree with what the NAB is wanting to do. I have friends who have XM and I enjoy it how it is. To go and eliminate channels will ruin XM all together. It should be up to the subscribers on what they listen to, because XM offers it's customers the option of having certain channels blocked because of content. The NAB's petition should be rejected, because it shouldn't be up to them on what us, the XM listeners, should or shouldn't listen to. If the NAB's petition is accepted not only will I myself not subscribe to the XM Satellite Radio service, but many customers now will be angry and canel the service. Also, if the FCC accepts the petition, many people will further be angered at the FCC for taking away things from us, for one removing channels due to content goes against our rights and freedoms as American citizens. We are supposed to be able to voice our opinions as well as do what we feel is right in our eyes to an extent, but governing our radio stations is absurd. So in closing in this comment, I would urge you, the FCC, to reject NAB's petition 04-160 and uphold our rights as citizens of the United States of America.
